

## FREE UNIVERSAL NETWORK (FUN) & BITTY TOKEN A COOPERATION NEVER TO BE BROKEN

### Free Universal Network Pre-Launch

Free Universal Network is creating over 25 exciting internet services under the FUN brand, supported by Smart Contracts on our forthcoming FUN blockchain. Our diverse offerings will include radio and television broadcasting, email and telecommunications, e-commerce, IT solutions, social media platforms, video services, read and write e-books, travel, and dating services, programs designed specifically for children and adults, and various dynamic business services. At FUN, there truly is something for everyone. **We Are Thrilled To Share The Official Launch Date: May 1, 2025.**

### Bitty Crypto Token

The financial structure of the FUN platform is centered around the Bitty Token, which serves as its exclusive cryptocurrency. The total issuance of Bitty Tokens is limited to 100 million. You might be thinking, isn't that a significant quantity? However, our analysis suggests otherwise. We anticipate that, over time, a minimum of ten million people will become part of the FUN community. Once we hit this target, the influx of new members will increase dramatically. With ten million members, each individual would possess, on average, ₿10. The Bitty Token is intentionally designed to maintain a stable value against the US dollar until the complete distribution of its supply. To encourage you to promote the Bitty Token program among friends, family, and acquaintances, we provide a 5% referral bonus in Bitty Tokens for every order they place. Bitty Tokens can be purchased in increments of \$10. As the saying goes, the early bird gets the fattest worm! **In This Case, Those Who Act Quickly Will Find Themselves With Phenomenally Desirable And Highly Lucrative Rewards.**
